

Jade's Group Reflection

What went well:

As with the previous assignment we have a great work ethic and our communication is very good. Because of this, we were very efficient in our work and extremely motivated to work well. As a group we are focused on finishing our parts on the set due time to make sure we do not fall behind in our own schedule. With communication we are very understanding of everyone's suggestions, point of views and we took that into account doing this project. We all are also very supportive in making sure members of the team or not too overwhelmed and would help anyone when needed. I also felt that our organizational and planning skills were very good as we set enough time to complete each section that we all were set to complete.

What could be improved:

I think when working as a group we did very well so I am not too sure what to improve on as we have incorporated the feedback from assignment 2. Possibly as a team we could work on the output of our work and make it even better.

At least one thing that was surprising:

I was surprised with how well we are able to follow our set due date while not falling behind in our other assignments and tests for our other courses. I think this is because we managed our time very well.

At least one thing that you have learned about groups:

We learned it was very important for us as a group to set a due date for each of our parts we had to complete. Even though we have utilized this throughout assignment 2 and assignment 3, I think because this time we were all very busy with our other courses, it was important to have this set due date to reply on.
